

CHINA-BASED NEW AND USED VEHICLE SOURCING AND EXPORT SUPPORT

Source the right new or used vehicles from China, within your budget.

We work with strong vehicle sources in China and help overseas dealers, importers and wholesale buyers identify suitable new or used vehicles, compare options, and coordinate the path from sourcing to export.

Budget-based vehicle matching

China market sourcing access

Export coordination support

PRIMARY BUYER TYPES

Dealers, importers, wholesale buyers

We focus on practical B2B inquiries rather than retail marketplace traffic.

MAIN VEHICLE DIRECTIONS

SUVs, pickups, LCVs, passenger vehicles, tricycles / quadricycles

We stay focused on practical vehicle directions that overseas buyers commonly request.

HOW WE SUPPORT

Source, shortlist, coordinate

We help move a case from requirement discussion to export-ready next steps.

FEE APPROACH

No separate sourcing fee in standard cases

For standard vehicle matching inquiries, we do not add a separate sourcing service fee.

01 / SUPPLY FOCUS

What We Supply

We focus on new and used vehicles that are commonly requested by overseas buyers and suitable for practical export inquiries.

01

New and Used SUVs

A strong fit for buyers looking for practical, market-friendly new or used vehicles across a wide price range.

02

New and Used Pickups

Relevant for markets where utility, durability and value are more important than high-end positioning.

03

Light Commercial Vehicles

Suitable for buyers sourcing practical business-use vehicles, including city and regional working fleets.

04

New and Used Passenger Vehicles

We also support passenger vehicle sourcing for buyers who need suitable options within a clear budget and vehicle profile.

05

New Gas / Electric Tricycles and Quadricycles

We can also assist with procurement and export coordination for new gas or electric tricycles and quadricycles when target market, specs and quantity are clear.

Our website is not a public stock list. Vehicle suitability is usually confirmed case by case based on market, budget, preferred type and current sourcing availability.

TEAM POSITIONING

Who We Are

We are a China-based new and used vehicle sourcing and export coordination team working with overseas dealers, importers and wholesale buyers.

Our role is practical: understand what the buyer needs, identify suitable new or used vehicle options through China-side sourcing channels, help review key information, and coordinate the next steps toward export.

We do not position ourselves as a large corporate exporter with global offices. Instead, we focus on responsive, case-by-case support for buyers who want a more direct and workable route into the China vehicle market.

02 / PROCESS

How We Work

We keep the process simple and buyer-oriented so overseas customers can quickly see whether there is a fit.

01

Send your market, budget and target vehicle type

Tell us what your market needs, your approximate budget range, preferred category, and any key requirements.

02

We source and shortlist suitable options

We work through China-side sourcing channels and identify options that are more likely to match your budget and target profile.

03

We help review key condition and document details

Before moving forward, we help check the main practical points such as vehicle basics, supporting information and document readiness.

04

We coordinate the next steps toward export

If there is a suitable match, we help organize the next stage so the path from sourcing to export is clearer and easier to manage.

In standard vehicle matching cases, we do not charge a separate sourcing service fee. The goal is to make the first step easier for serious buyers.

03 / WHY WORK WITH US

Why Work With Us

Buyers usually work with us for practical reasons rather than polished sales language. The value is in access, matching and coordination.

Access to strong vehicle sources in China

We work with established China-side vehicle sources rather than relying only on what a buyer can easily see from outside the market.

Vehicle matching based on budget and target specs

We do not push a generic list first. We start from what the buyer is trying to achieve and what budget range makes sense.

No separate sourcing fee for standard inquiries

For standard vehicle matching inquiries, we do not add a separate sourcing service fee, which helps buyers explore options more easily.

Practical support from sourcing to export coordination

We help connect the dots from vehicle search to the next export-facing steps, so the process is more organized and less fragmented.

Best suited for

Dealers, importers and wholesale buyers looking for practical new or used vehicle sourcing support from China.

Not designed for

Retail consumer browsing, inflated marketplace-style promises, or unrelated mass-market positioning.
